## A WORD ABOUT **WEATHER**

### **WIND**

Outdoor stands will hold up nicely in a strong breeze — that is, in winds of up to 10 meters per second (36 km/h), or category 6 on the [Beaufort scale](#). This includes most conditions in which outdoor balloon decor can be considered a good idea.

*A caveat: Features of the landscape or architecture of a given location may produce wind tunnels or sudden gusts, and should be taken into account.*

### **RAIN**

The outdoor Pompalloon base is designed to withstand brief exposure to rain. However, leaving it to soak for days at a time may result in surface deformation, and will eventually degrade the integrity of the base.
