Glitz Baroque

We'll let you in on something: *Baroque* is technically just a Triole with all three fringe colours set to gold or silver. But the effect is something else: gleaming, iconic, built to catch the light — and hold it.

A WORD ABOUT **WEATHER**

WIND

Outdoor stands will hold up nicely in a fresh breeze — that is, in winds of up to 7 meters per second (25 km/h), or category 4 on the [Beaufort scale](#). This includes most conditions in which outdoor balloon decor can be considered a good idea.

A caveat: Features of the landscape or architecture of a given location may produce wind tunnels or sudden gusts, and should be taken into account.

RAIN

The outdoor Pompalloon base is designed to withstand brief exposure to rain. However, leaving it to soak for days at a time may result in surface deformation, and will eventually degrade the integrity of the base.
